PROFESSIONAL SUMMARY

Computer Science graduate with strong skills in Machine Learning, Data Science, and Full-Stack Development (Python, SQL, Django, Flutter, TensorFlow). Completed Data Science Internship at Soften Technologies and built a CNN-based Diabetic Retinopathy Detection system using Flask; seeking entry-level Data Scientist or Software Developer role.

SKILLS

- **Programming:** C, Python, SQL
- **Frameworks:** Django, Flask, Flutter
- **Machine Learning & AI:** CNN, TensorFlow, OpenCV, Scikit-learn
- **AI Tools:** GitHub Copilot, OpenAI Codex, Cursor AI, Jupyter Notebook
- **Data Tools:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel

Version Control: Git, GitHub

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Communication Skill

WORK EXPERIENCE

Soften Technologies

Junior Data Scientist | 08/2025 - 01/2026

- Performed data preprocessing and visualization using Pandas and Matplotlib.
- Built and evaluated machine learning models for classification tasks.
- Assisted in deploying ML models using Flask framework.

PROJECTS

Diabetic Retinopathy Detection using CNN | 02/2026

- Developed a Convolutional Neural Network (CNN) model for fundus image classification.
- Applied data augmentation and preprocessing to improve model accuracy.
- Integrated model with Flask web application for real-time predictions.
- [GitHub](#)

NSS Management System (Amable) | 03/2025

- Built full-stack web application using Django and Flutter.
- Designed and managed MySQL database for student activity tracking.
- Implemented authentication and role-based access control.

CERTIFICATIONS

- **Digital Forensics Internship** - Red Team Hacker Academy | 09/2025
- **Training Program in Data Science** - Soften Technologies | 02/2025 - 07/2025

EDUCATION

B.Sc. Computer Science

Calicut University | CGPA-6.483 | 08/2022 - 03/2025

LANGUAGES

- English
- Arabic
